Driving license

Additional information

Other activities

Projects:

<http://www.viperhost.net>

Free web hosting - still in development (based on virtual users mailboxes, domains and ftp accounts, using nginx as a web server, postfix and dovecot for smtp/imap/imaps, pureftp for ftp server, php-fpm as a backend php server).

Projects:

<http://www.visualserver.org>

Main project consist in setting up a unix/linux server for web hosting and shell services, the hosting and the shells are for educational purpose and also are free. The system runs on an x86_64 bit CPU, with a custom application build, like nginx, php-fpm, pureftp and much more. The web server is nginx with php-fpm (fastcgi) running as a backend php server. The system is running on Ubuntu 8.04 LTS.

Projects:

<http://blog.robertalks.com> and <http://www.robertalks.com>

Personal blog and web site. Build using CentOS 5.3, nginx as a web server with php-fpm (fastcgi) as php backend, mysql server 5.0.x.

Mobility

I am willing to relocate in the country and abroad.

I am available for business travel more than 100% from my working time.
